

# Requirements Verification Traceability Matrix (RVTM)

## System Functional (Admin & Control) RVTM Tree

This worksheet contains the System Functional Requirements traced from the Biometric FRD & Legacy requirements that are related to specific areas of the administrative and control functions

## System Non-Functional (Admin & Control) RVTM Tree

This worksheet contains the System Functional Requirements traced from the Biometric FRD & Legacy requirements that are not related to specific areas of the administrative and control functions

This worksheet contains the System Non-Functional Requirements traced from the Biometric FRD & Legacy requirements

NGI System  
Requirement  
Types:

SFR	System Functional Requirements contained in the NGI System requirements Document (SRD)
SNFR	System Non-Functional Requirements contained in the NGI SRD
SUR	System User Requirements contained in the NGI SRD

NGI  
Biometrics/  
Legacy  
Requirement  
Types:

FR	Functional Requirements contained in IAFIS Legacy SRD and/or individual Initiative FRDs
NFR	Non-Functional Requirements contained in IAFIS Legacy SRD and/or individual Initiative FRDs
UR	User Requirements contained in IAFIS Legacy SRD and/or individual Initiative FRDs

NGI  
Stakeholder  
Requests:

STRQ	Stakeholder Requests traced to NGI SRD (SFR, SNFR, SUR) requirements
------	----------------------------------------------------------------------

Biometric/Legacy IAFIS Requirements traced to NGI SFR, SNFR, or SUR

LEG.	Legacy IAFIS Requirement followed by either UR, FR, NFR traced to SUR, SFR, or SNFR and requirement number  LEG.UR.xxx LEG.FR.xxx LEG.NFR.xxx
------	-----------------------------------------------------------------------------------------------------------------------------------------------------------

BIO.	Interoperability Requirement followed by either UR, FR, NFR traced to SUR, SFR, or SNFR and requirement number  BIO.UR.xxx BIO.FR.xxx BIO.NFR.xxx
------	---------------------------------------------------------------------------------------------------------------------------------------------------------------

Deleted Requirements Text

Deleted.	Deleted Requirement.
Deleted MCP.	Deleted Major Case Print Requirement(s) that will still trace from Legacy IAFIS, but no functionality will be implemented in NGI.
